New, bigger booth demonstrates expansion course

LANCOM at CeBIT:

300-Mbit access points, WLAN Controllers, UMTS routers, and an updated partner program

Aachen, January 17, 2008 – At this year's CeBIT in Hall 13, Booth C34 Rohde & Schwarz Networks and Cybersecurity presents a selection of new WLAN and UMTS products. LANCOM is also introducing an update to their partner program for specialist resellers and system vendors as well as an improved training concept.

"Visitors this year can look forward to several new products and improvements to our support of business partners," comments Ralf Koenzen, Managing Director of Rohde & Schwarz Networks and Cybersecurity GmbH. "We will also be presenting a number of updates to existing products. Cebit is without doubt the most important exhibition for Lancom for contact to our specialist resellers, system vendors and customers. That's why we are very much looking forward to this year's Cebit in Hanover."

On a new and larger booth extending over 120 sqm the manufacturer based in Aachen, Germany presents its new LANCOM L 300 Wireless range of access points. Greater range, greater speeds and even easier management are the main characteristics of the new 300-Mbps class devices. LANCOM introduces the first business access points based on the 802.11n draft 2.0 standard and featuring a Gigabit Ethernet connection.

Also on display are the Wireless LAN Controllers LANCOM WLC-4006 and WLC-4025. These devices support up to 100 LANCOM wireless LAN access points and routers, including the latest generation of 300-Mbit access points.

In addition to cabled broadband access, the new VPN routers LANCOM 1751 UMTS and 3850 UMTS also support high-speed cellular connections via UMTS. The LANCOM 1751 UMTS is a business VPN router with integrated UMTS and ADSL2+ modems, it supports ISDN and has all of the interfaces necessary for professional site connectivity; the LANCOM 3850 UMTS has an integrated WLAN module. Furthermore LANCOM is showcasing their current portfolio of solutions for site connectivity, wireless indoor and outdoor networks, and VoIP solutions for small, medium-sized and large enterprises.

LANCOM will also be providing information on their improved training program. The Training Center offers a new program with over 80 newly designed courses and individual certifications.

Press representatives can contact Detlev Henning (AxiCom press agency) or the LANCOM press spokesperson Eckhart Traber to make an appointment.

Rohde & Schwarz Networks and Cybersecurity background

Rohde & Schwarz Networks and Cybersecurity GmbH is a leading German manufacturer of reliable communications solutions for large enterprises and SMEs, public authorities and institutions. The company supplies products and software for IP-based VPN, VoIP and wireless networks, along with support and services. These solutions are planned and developed specifically for the requirements of business customers. The company's focus is on Internet access products with integrated high-quality firewalls for ADSL, SDSL, ISDN and UMTS access and on comprehensive solutions for network connectivity and security with virtual private networks (VPN), wireless networks (wireless LAN) and public spots. Rohde & Schwarz Networks and Cybersecurity GmbH is headquartered in Würselen near Aachen and has sales offices in Munich, London, Madrid, Bolzano, Amsterdam and Prague. Ralf Koenzen is the company's founder and Managing Director.
