LANCOM Systems launches a lucrative firewall promotion

11/18/2019

Next-generation UTM firewalls bundled with free licenses

Press Release 2019-601

Download PDF

Aachen, November 18, 2019—True to the motto “IT security can be so simple”, German network infrastructure supplier Rohde & Schwarz Networks and Cybersecurity has an attractive firewall bundle for the channel. From now until the end of March 2020, specialist resellers opting for a R&S®LANCOM Unified Firewall UF-200 or UF-300 will receive a free 3-year full license on top.

The easy-to-operate next-generation UTM firewalls address the security requirements of small and medium-sized enterprises and offer powerful and reliable all-around protection against malware and cyberattacks. They stand out with their comprehensive security-in-a-box technology and an innovative graphical user interface that offers an overview of all of the secured areas within an organization. Rounding off the package is a new, intuitive setup wizard that has the UTM solution up and running within minutes.

Promotion on until March 31, 2020

The campaign is aimed at all LANCOM specialist resellers and system vendors. They have a one-off opportunity to secure a promo bundle with the UF-200 or UF-300 together with a free 3-year full license. Orders are placed using a registration form on the LANCOM website:

www.lancom-systems.com/firewall-promotion/. Online retailers and sub-distributors are excluded from the offer.

Network & security “??Made in Germany”

LANCOM next-generation firewalls are developed and programmed in Germany. Their UTM functions ideally supplement existing LANCOM network infrastructures with new levels of IT security and they offer future-proof protection for corporate networks.

Rohde & Schwarz Networks and Cybersecurity background:

Rohde & Schwarz Networks and Cybersecurity GmbH is a leading European manufacturer of network and security solutions for business and the public sector. The portfolio includes hardware (WAN, LAN, WLAN, firewalls), virtual network components, and cloud-based software-defined networking (SDN).

Software and hardware development as well as manufacturing take place mainly in Germany, as does the hosting of the network management. There is a strong focus on trustworthiness and security. The company is committed to products that are free from backdoors and is a holder of the trust mark “IT Security Made in Germany” as initiated by the German Ministry of Economics.

Rohde & Schwarz Networks and Cybersecurity was founded in 2002 and has its headquarters in Würselen near Aachen, Germany. Customers include SMEs, government agencies, institutions, and major corporations from all over the world. Since summer 2018, the company has been an independent subsidiary of the Munich-based technology group

Rohde & Schwarz.
