Aachen, 21 October 2020 - Effective immediately, the German network infrastructure supplier, Rohde & Schwarz Networks and Cybersecurity and Spectralink have formed a new technology partnership. Extensive interoperability tests between R&S®LANCOM WLAN Access Points and Wi-Fi devices by the enterprise mobility specialist, Spectralink, have confirmed excellent voice quality and roaming properties in Voice-over-WLAN applications.

Customers of both companies equally benefit from the certification. The Spectralink VIEW certification (Voice Interoperability for Enterprise Wireless) in fact guarantees optimal interaction between LANCOM WLAN infrastructures and Spectralink VoWLAN handsets. In particular, costly interoperability tests will not be necessary when existing WLANs are expanded to include wireless telephony or there is a planned migration to a LANCOM WLAN.

The focus of the tests was on excellent voice quality, uninterrupted roaming, efficient bandwidth management and robust network security in WLAN. The certification covers LANCOM series LN-17xx, LN-830x and LN-86x (from LCOS-Version 10.32) access points and Spectralink series 8440 and Versity 95/96 Wi-Fi handsets.

About LANCOM Systems:

Rohde & Schwarz Networks and Cybersecurity GmbH is a leading European manufacturer of network and security solutions for business and the public sector. The portfolio includes hardware (WAN, LAN, WLAN, firewalls), virtual network components, and cloud-based software-defined networking (SDN).

Software and hardware development as well as manufacturing take place mainly in Germany, as does the hosting of the network management. There is a strong focus on trustworthiness and security. The company is committed to products that are free from backdoors and is a holder of the trust mark “IT Security Made in Germany” as initiated by the German Ministry of Economics.

Rohde & Schwarz Networks and Cybersecurity was founded in 2002 and has its headquarters in Würselen near Aachen, Germany. Customers include SMEs, government agencies, institutions, and major corporations from all over the world. Since summer 2018, the company has been an independent subsidiary of the Munich-based technology group Rohde & Schwarz.
