Set up VPNs by mouse click - "LANCOM 1-Click-VPN" sets up your configuration in an instant

08/27/2007

PRESS RELEASE 2007-138

Set up VPNs by mouse click

"LANCOM 1-Click-VPN" sets up your configuration in an instant

Aachen, August 27, 2007 - The new LCOS 7.20 provides all current VPN-capable routers with "1-Click-VPN". These new unique features make child's play of VPN site-to-site coupling and of setting up VPN remote access.

With the free upgrade to the LANCOM routers' LANCOM management system, customers benefit once again from LANCOM's innovation.

Until now, VPN installation has gained the reputation of being highly complex, poorly documented, and extremely time consuming.

R&S®LANCOM VPN routers make that a thing of the past. Now, even complex VPN scenarios can be fully automatically configured with a click of the mouse, and no expert knowledge is required. For example, to connect new R&S®LANCOM VPN routers to company headquarters via VPN tunnel, they are simply moved by "drag and drop" onto the central device in the LANCOM management software LANconfig. Within seconds the complete VPN configuration is written to the device and the secured tunnel is available. Never before was the configuration of VPN tunnels this quick and easy.

Setting up an access account for a VPN software client is just as easy. 1-Click-VPN generates a script for the LANCOM Advanced VPN Client, and importing this into the R&S®LANCOM Advanced VPN Client is all the configuration work that is required.

Further details on 1-Click-VPN in the new LCOS 7.20 can be found on the LANCOM web site under the following address:

www.lancom.eu/1-Click-VPN

Gunnar Mayer, Secure Access Product Manager at LANCOM Systems: "The role of specialist resellers is shifting from specialist to all-rounder, meaning that they have to deal with more subjects in less time. These gains in time and usability when configuring VPNs offer faster commissioning and easier maintenance of VPN installations. By introducing 1-Click-VPN, we are demonstrating once again the importance of specialist resellers to us and our determination to be "Channel Champions".

Rohde & Schwarz Networks and Cybersecurity background

Rohde & Schwarz Networks and Cybersecurity GmbH is a leading German manufacturer of reliable communications solutions for large enterprises and SMEs, public authorities and institutions. The company supplies products and software for IP-based VPN, VoIP and wireless networks, along with support and services. These solutions are planned and developed specifically for the requirements of business customers. The company's focus is on Internet access products with integrated high-quality firewalls for ADSL, SDSL, ISDN and UMTS access and on comprehensive solutions for network connectivity and security with virtual private networks (VPN), wireless networks (wireless LAN) and public spots. Rohde & Schwarz Networks and Cybersecurity GmbH is headquartered in Würselen near Aachen and has sales offices in Munich, London, Madrid, Bolzano, Tilburg and Prague. Ralf Koenzen and Ulrich Prinz are the company's founders and Managing Directors.
