

R&S® LANCOM BPjM Filter Option

Protection of minors according to official German regulations

Underage end users are increasingly confronted with content on the Internet that is harmful to them. With the R&S® LANCOM BPjM Filter, you can now maximize the protection of minors, e.g. in schools or youth facilities. With the help of the official website list of "Bundesprüfstelle für jugendgefährdende Medien" (German Federal Review Board, BPjM), domains whose content is officially classified as harmful are not accessible to the relevant target group in Germany. Continuous updates and extensions of this list are guaranteed.

- ▶ Blocking of content harmful to underage end users in Germany
- ▶ Automatic updates and extensions of the filter list
- ▶ 5-year license for an unlimited number of users
- ▶ BPjM filter can also be activated via an active R&S® LANCOM Security Essentials Option
- ▶ Available in Germany and for R&S® LANCOM VPN and VoIP routers, central-site VPN gateways, and WLAN controllers as of LCOS 10.70
- ▶ Simply upgrade your existing device and save on hardware components

R&S®LANCOM BPjM Filter Option

Protection against content harmful to young people in Germany

By using the R&S®LANCOM BPjM Filter in Germany, you ensure that content classified as harmful to underage end users is blocked for children and young people in a legally regulated procedure by the "Bundesprüfstelle für jugendgefährdende Medien" (German Federal Review Board, BPjM). This ensures maximum safety for minors in the school environment, during leisure activities, or at home.

Flexibility due to unlimited number of users

The R&S®LANCOM BPjM Filter is licensed for a R&S®LANCOM device regardless of the number of users. The unrestricted youth protection filter is therefore particularly practical in growing networks of schools and youth facilities of all sizes.

Automatic updating of the filter list

New threats on the web require an ongoing reassessment of the risk to minors. That's why the website list is constantly checked, expanded, and updated by the "Bundesprüfstelle für jugendgefährdende Medien" (German Federal Review Board, BPjM). For a web filter that goes beyond the protection of minors, we recommend the R&S®LANCOM Security Essentials Option. In addition to the German BPjM filter, which is integrated free of additional charge, this also contains configurable and category-based overrides to protect against network abuse.

Easy upgrades

The R&S®LANCOM software options turn a simple network into a customized and cost-efficient solution that meets your individual needs. Simply install them on your existing hardware and you upgrade your network with the desired feature. The advantage: No additional hardware components are required. The costs and the administration overhead of the entire network are reduced. Genuine added value comes in terms of the system's future viability, because the options transform a network into a customized and scalable networking solution.
