

R&S® LANCOM SFAN-CS8

Hot-swappable fan modules for uninterrupted operation of the R&S® LANCOM CS-8132F with F2B or B2F airflow

By selecting the optimal ventilation concept, you ensure maximum performance and reliable overheating protection for the R&S® LANCOM CS-8132F, while also extending the device's service life. For uninterrupted cooling during rack operation, the core switch is available in two hardware variants with different fan modules: axial fans supporting either front-to-back or back-to-front airflow (F2B / B2F). The fan module R&S® LANCOM SFAN-CS8-F2B or SFAN-CS8-B2F can be swapped during operation if the built-in fans fail, ensuring your network remains available at all times.

- ▶ Minimum 4,500, max. 30,000 rotations/minute
- ▶ Easy to replace without tools
- ▶ Minimum air flow rate 19 m³/h, max. 60 m³/h
- ▶ Operating time of at least 50,000 h at 40 °C
- ▶ R&S® LANCOM SFAN-CS8-F2B for R&S® LANCOM CS-8132F-F2B
- ▶ R&S® LANCOM SFAN-CS8-B2F for R&S® LANCOM CS-8132F-B2F
