

R&S® LANCOM SFAN-XS6

Hot-swappable fan module for uninterrupted operation of the R&S® LANCOM XS-6128QF

The exchangeable fan module ensures that your R&S® LANCOM XS-6128QF is always operating without interruption and thus protected from overheating. Since it can be replaced during operation, it makes a significant contribution to the redundancy concept of this 10G aggregation switch.

- ▶ Minimum air flow rate 19 m³/h
- ▶ Operating time of at least 50,000 h at 40°C
- ▶ Easy to replace without tools
