

R&S® LANCOM WLC Upgrade Option

The WLC Upgrade Option enables you to increase the number of access points and WLAN routers that the controller is able to manage. This is a major advantage for growing networks: There is no need to purchase any additional hardware, and existing WLAN controllers are easily upgraded with additional device licenses.

- ▶ Option that upgrades WLAN controllers to manage up to 1,000 access points or WLAN routers
- ▶ Available as the WLC AP Upgrade +6 option for the management of additional 6 access points and WLAN routers, additive to 12 devices (1800 series), 30 devices (1900 series) or 60 devices (2100EF and WLC-60).
- ▶ Available as WLC upgrade +10, +25, +100 and +500 option for 10 to 500 additional access points and WLAN routers
- ▶ Simply upgrade your existing device and save on hardware components

R&S® LANCOM WLC Upgrade Option

Upgrade of manageable WLAN devices

The R&S® LANCOM WLC Upgrade Option enables you to increase the number of access points and WLAN routers that the controller is able to manage. Your network stays optimally scalable—without additional hardware components.

Maximum future viability

R&S® LANCOM products are designed for a service life of several years and are equipped with hardware dimensioned for the future. Even reaching back to older product generations, updates to the R&S® LANCOM Operating System – LCOS – are available several times a year, free of charge and offering major features.>
