

R&S®LANCOM R90X Enterprise Option

Feature upgrade for your R&S®LANCOM VoIP routers of the R90X series

Growing networks go hand in hand with increasing demands on the functions of individual network components - in best case without the need to invest in new hardware. In order to be able to react flexibly to changing requirements, the R&S®LANCOM R90X Enterprise Option is a software upgrade that offers you a cost-effective, fast and flexible expansion of your existing VoIP routers of the R&S®LANCOM R90X series. This increases the number of your existing 3 IPsec VPN channels to 5 VPN tunnels and expand the possibilities of network virtualization eightfold from 2 to a total of 16 ARF networks. For even more security and optimal scalability, the upgrade option also includes the activation of the enterprise routing protocols BGP and OSPF. In addition, the R&S®LANCOM R90X Enterprise Option upgrades the router to a fully-fledged SD-WAN gateway including zero-trust and cloud-managed security functions. If you need even more IPsec VPN channels for your network, you can also use the R&S®LANCOM VPN-25 Option after activating the R&S®LANCOM R90X Enterprise Option to extend your channels from 5 to 25.

- ▶ Software upgrade for the R&S®LANCOM routers of the R90X series
- ▶ Extension from 3 to 5 IPsec VPN tunnels
- ▶ Extension from 2 to 16 ARF networks
- ▶ Activation of the Enterprise Routing protocols BGP and OSPF
- ▶ Additional upgrade to 25 VPN channels possible with the R&S®LANCOM VPN Option

R&S® LANCOM R90X Enterprise Option
